

PROJECT PROPOSAL OUTLINE

"FEEL FREE"

In today's world working women are facing a lot of problems in their day to day life. Whether it is moving to a new city or choosing a new profession.

To provide a solution to this problem we are coming up with an innovative project "FEEL FREE". A website that will provide solution to basic problems faced by working women.

As soon as you will log in, you will be provided location of nearest hospitals , police station , grocery stores and other basic necessities. Along with it you will be asked to provide emergency contact details of your friends and family so that you can inform them in a single click in case of emergency. The website will also host a forum for discussion where people from similar profession can interact. Users can read inspiring stories of amazing women from their field. The website will have sayings and quotes from great people that will inspire and provide motivation. The most important feature of website will be an A.I. chat bot that will ask questions regarding your problems and come up with a solution.

We hope this project will help in improving situation of working women.
